EDUCATION

University of Malta

BSc in Artificial Intelligence

Msida, Malta

Expected Graduation, November 2028

- **Related Coursework:** Foundations of Data Science, Programming for AI (Python, HTML, CSS, JS), AI Numerical Methods, Databases and Information Management, Data Structures & Algorithms, Foundations of Artificial Intelligence, Knowledge Representation & Reasoning, Mathematics of Discrete Structures.

Junior College

Matriculation Course

Msida, Malta

October 2023 – April 2025

- **A-Levels:** Pure Maths (B), Computing (B)

PROJECTS

Portfolio Website

Solo Project

Malta

March 2026

- Developed a responsive portfolio using semantic HTML5, CSS3, and vanilla JavaScript to display projects cohesively.
- Implemented a mobile-first design using CSS media queries to accommodate cross-platform accessibility.
- Built scroll-based navigation highlighting using IntersectionObserver API to avoid performance heavy event listeners.
- Designed interactive education and project cards with CSS transitions and JavaScript class toggling, applying blur effects on hover to enhance text readability.
- Integrated automatic theme adaptation using CSS prefers-colour-scheme media queries and custom properties.
- Deployed via GitHub Pages with SSH-authenticated Git workflow for version control and iterative updates.

Weather-Tourism Data Analysis

Solo Project

Malta

March 2026

- Engineered a comprehensive weather and tourism data pipeline spanning a 15-year timeframe for feature correlation.
- Applied Lasso Regression (L_1 Regularisation) to identify and rank the most influential weather features as primary tourism drivers.
- Created visualisations comparing specific weather conditions against historical tourist arrivals to display trends.
- Integrated Google Trends search volume data to further analyse interest trends in relation to tourism demand.
- Identified and isolated anomalous data points through rigorous statistical analysis to enhance the overall precision and reliability of findings.

European Wildlife Dataset Cleaning

Solo Project

Malta

March 2026

- Cleaned 1000+ row European wildlife observation dataset using pandas, implementing an end-to-end ETL pipeline from raw data profiling to analysis-ready output.
- Standardized categorical data with pattern matching to correct typos and inconsistencies across animal species and country names.
- Validated geographic and biological measurements using domain research and statistical profiling, removing negative values and species-specific outliers.
- Implemented grouped imputation using country-based means and species medians for missing values.
- Documented data decisions in markdown, ensuring reproducible logic for duplicate and null handling.

ACTIVITIES AND LEADERSHIP

University of Malta Group Projects

Team Leader

Msida, Malta

October 2025 – January 2026

- Assigned tasks, managed deadlines, upheld work quality standards, and synthesized team contributions into a cohesive final product.

SKILLS

Personal Skills: Leadership, Adaptability, Attention to Detail, Analytical, Teamwork

Languages: English, Maltese

Programming: Python, HTML/CSS, JavaScript, SQL

Tools: VSCode, Jupyter Notebooks, Git
